

Job opportunity at Aelin Therapeutics –

Research Associate/Lab technician - Peptide chemistry (Ghent, Belgium)

Aelin Therapeutics is a biopharmaceutical company pioneering peptide-based novel drug modalities to create a powerful first-in-class antibiotics and agents against high-value undruggable human targets. The technology, branded Pept-ins™, harnesses the power of protein aggregation to induce specific functional knockdown of a target protein. The Pept-in™ technology allows for the rational design of novel peptide-based therapeutics and differentiates itself from other therapeutic modalities through its unique mode of action, its designability and broad target space.

Aelin Therapeutics is building a motivated and innovative team to realise the therapeutic potential of Pept-ins. The company has activities in Ghent and Leuven, Belgium. Job opportunity is for a vacancy at the facilities in Ghent. For more information please visit www.aelintx.com.

Profile

The ideal candidate will have a bachelor's degree in chemistry or life sciences, and will have previous laboratory experience, ideally gathered in the R&D life science sector. Experience in working as a technician in biotechnology and/or drug discovery in the biopharmaceutical industry is highly desirable. The candidate will work with R&D scientists to support the R&D strategy.

The candidate should work effectively in a fast-paced, dynamic and exciting small company environment. **The position is open for Aelin Tx's new facilities in Ghent.**

Responsibilities

- General support to R&D activities (including peptide synthesis, peptide purification through chromatography (HPLC), peptide analysis through mass spectrometry)
- Compound handling/logging and preparation of stock solutions
- QC, record-keeping
- Together with the R&D scientists evaluate new procedures and techniques. Maintain procedure manuals and standard operating procedures to ensure compliance with overall R&D health and safety

Key skills

- General R&D capabilities, understanding of chemistry and chemical structures of benefit
- Good computing skills in MS Office suite
- Ability to adapt and adjust to changing priorities, and to take on new tasks
- Motivated team player with the ability to efficiently manage their own work
- Excellent organisational skills, eye for detail and natural desire to keep things in order
- Excellent written and oral skills (including English)

Our offer

- A competitive salary and benefits package
- An entrepreneurial and stimulating working environment in an ambitious start-up biotech company
- Excellent career development opportunity, with exposure to all aspects of R&D in the company
